

**3I SHOW NEWS RELEASE
1/25/21**

Since 1982, Tri-States Grain Conditioning, Inc. has been providing temperature monitoring cables and systems to the grain industry. Thermocouple cables offer the best mix of proven reliability and technological innovation for achieving optimum grain storage quality. Custom-built for each bin, silo or flat storage application, TSGC cables are reliable, accurate, and built to last. Portable, computerized, remote and wireless (Internet or Satellite based) systems are available for any size operation or budget as well as hazard monitoring, bearing and belt misalignment monitors and motion detection equipment. For all your grain management needs, stop by booth #I-245 and visit with Greg Van Sickle, TSGC Sales Manager, call 800-438-8367 or check out our website at www.tsgcinc.com. Email inquiries may be sent to tsgc@tsgcinc.com.
